Trivia Challenge

We need you to help us update our databases. Are you new? Did you change accounts or positions? If so please let us know. We need to get those changes into our system to ensure the right people are getting the right information. You can E-mail or fax the information back to your ShawFlex representative.

WWW...What?

Ken Paul, Brenda Knutson

Of course the first web site you should visit is www.shawflex.com. Our web site has our upcoming tradeshow and catalogues posted on it. In this site you can access information and let your customer know where he can find the information quickly.

If you want your web site address posted on our site or if you would like to connect your web site to ours, please contact Catherine Korski at 416 744 5823. Catherine will be more than happy to assist you in this process.

Electrical Insulation - the Sequel

Brenda Knutson, Ken Paul

The previous edition explained the function of insulation. ShawFlex can offer a great selection of insulation types for your clients' specific applications.

Thermoplastic: TW75 PVC, LAG PVC, TPE, EVA, 105°C PVC (UL), PVC/Nylon (TFFN, THHN)

Thermoset: RW90 XLPE, Nuclear rated XLPE, XLPO, Low Smoke/Zero Hal

Before your ask...

Thermoplastic is a material that can be repeatedly softened and hardened with no effect on its properties.

Thermoset is a material that has been vulcanized by heat or some other means and becomes infusible and insoluble. The process is irreversible.

A New Look. A New Name

ShawFlex has a new look to our name. Effective 04 May 2001, Shaw Industries changed its name to ShawCor Ltd. The name change was done to allow us to operate under the same name around the world without conflict. ShawFlex is now a ShawCor Company. With this name change also came changes to our E-mail addresses. The new E-mail addresses for Ken and Brenda are as noted below. The phone numbers, fax numbers and 1-800 numbers did not change.

Western Droppings/Eastern Tidbits

Utility and generating stations are the name of the game in Canada this year. In Western Canada wind generation stations, expansions by Epcor and ATCO and co-generation stations are all being done. ShawFlex can help you with your utility cable needs. Our new utility cable line called ShawGen is ready to go! For your current brochure, please contact your sales office and we will be pleased to send this information to you.

Remember your Inside Sales Contacts are there for you...
